

C900

Heavy Duty Coin Counter / Sorter

Heavy Duty Versatility

The Cassida C900 is a heavy-duty coin counter / sorter designed for accurate and convenient counting in high-volume environments. Versatile and easy to use, it delivers all of the features you would expect to find on a professional coin processor. The noise-reducing, padded coin bins and optional coin bagging attachments are all accessible from the front, minimizing operating space.

■ Easy to use

The C900 recognizes individual denominations and sorts them automatically into large bins. No dials and no knowledge of coin dimensions required. Just load the hopper, press start, and walk away. Large, easy-to-read keys provide quick access to commonly-used functions.

■ Built to last

The C900 is no lightweight when it comes to coin processing: its nearly 34 pound net weight comes from its rugged steel case and precision-engineered steel components. From the ground up, it has been designed for years of high-volume operation.

■ Counting, adding, and batching

The C900 includes all the counting modes you would expect to find on a heavy-duty coin sorter, plus a memory function. Batch mode counts amounts as low as 1 coin or as high as 9,999. An easy-to-read LED display shows both number of coins and dollar amount for each denomination, as well as the grand total.

■ One step counting for multiple denominations

The C900 accurately sorts and counts mixed denominations from its large hopper without the need for time-consuming adjustments and bag changes.

■ Options that extend versatility

Bulk count or batch individual denominations into their own bag in one easy step with the optional coin bagging attachments. The optional printer creates hard copies of reports.

Reports number and value of coins

Bag coins and print reports with optional attachments

Product Specs

Model range:	C900
Dimensions, unit:	18.9" w x 11" d x 12.5" h (480mm x 280mm x 318mm)
Weight:	34 lb (15.4 kg)
Power input:	110-240 VAC 50-60Hz
Power consumption:	<30 watts
Warranty:	1 year parts and labor warranty

Counting Specs

Counting speed:	600 coins/minute
Hopper capacity:	1800 (dimes)
Countable coin thickness:	≤ 0.157" (4mm)
Countable coin diameter:	0.55" – 1.22" (14mm - 31mm)
Countable coins:	1¢, 5¢, 10¢, 25¢, 50¢, \$1 (Canadian model also counts \$2)

Operating Modes

Count:	simple count; auto-stop, with memory function
Batch:	presets and programmable to 9,999
Add:	0 – 9,999; adds up all counts
Reports	1. count by denomination 2. dollar amount by denomination 3. dollar amount grand total
