Cassida Omni-ID verifies both currency and IDs in a single machine

(December 15, 2015) **Tualatin, OR** — Cassida today is introducing the Omni-ID, a single machine that combines a powerful automatic counterfeit detector with advanced ultraviolet LED illumination to authenticate both US currency and IDs.

“The Cassida Omni-ID gives you confidence and protection by the dollars, identification cards and checks you take are genuine,” said Matt Goldfain, product marketing manager for Cassida. “The Omni-ID employs proven, technologically-advanced detections to automatically authenticate currency and IDs, alerting users to possible counterfeit bills and fake IDs.”

For counterfeit bill detection, simply feed a bill through and a green PASS or red FAIL will immediately illuminate, signifying whether the money is genuine or counterfeit. Omni-ID works faster and is more conclusive about its results than common counterfeit pens. Results show in less than half a second.

To authenticate identification cards, checks and payment cards, Omni-ID uses industry-leading UV LED technology to authenticate security features that can only be viewed under a specific light spectrum. Place an ID or card in the Omni-ID lower slot and powerful, long-lasting LEDs automatically illuminate UV security marks embedded in genuine US drivers licenses, state-issued IDs, checks, credit cards and other UV security-bearing documents.

“The Omni-ID protects businesses and employees from fraud, because it gives immediate verification whether bills or IDs are real,” Goldfain said. “Anyone who handles cash or checks IDs will appreciate the Omni-ID automatic counterfeit detection and ID verification. Retailers, bars, restaurants, schools, municipalities and human resources departments can all benefit from the Omni-ID.”

The Omni-ID has a small footprint, making it ideal for busy cash environments that typically have limited space. Its indicators are designed to work in even the brightest retail lighting, assuring vibrant UV illumination on IDs and easy-to-read PASS and FAIL indications.

The Omni-ID is available from online retailers.
